

A close-up photograph of a person's hands working on a pottery wheel. The hands are positioned on the left side of the wheel, with fingers pressing into the wet clay to shape it. The person is wearing a silver bracelet on their left wrist. The pottery wheel itself is made of wood and is mounted on a stand. The background is dark and out of focus.

ONEFORCODE

-ONE FOR ALL-

A photograph of a man with long, light-colored hair and a beard, wearing a dark t-shirt with the word "CHAMPION" and a paint-splattered apron. He is standing at a wooden table, painting a large mural on a textured wall. Several jars of paint are on the table in front of him.

IDEA

- ▶ A new way of working on tech projects
- ▶ People help each other in building their dreams
- ▶ They do it by sharing ... parts of their project

IDEA

They can *delegate* pieces of their project to other users

BUT

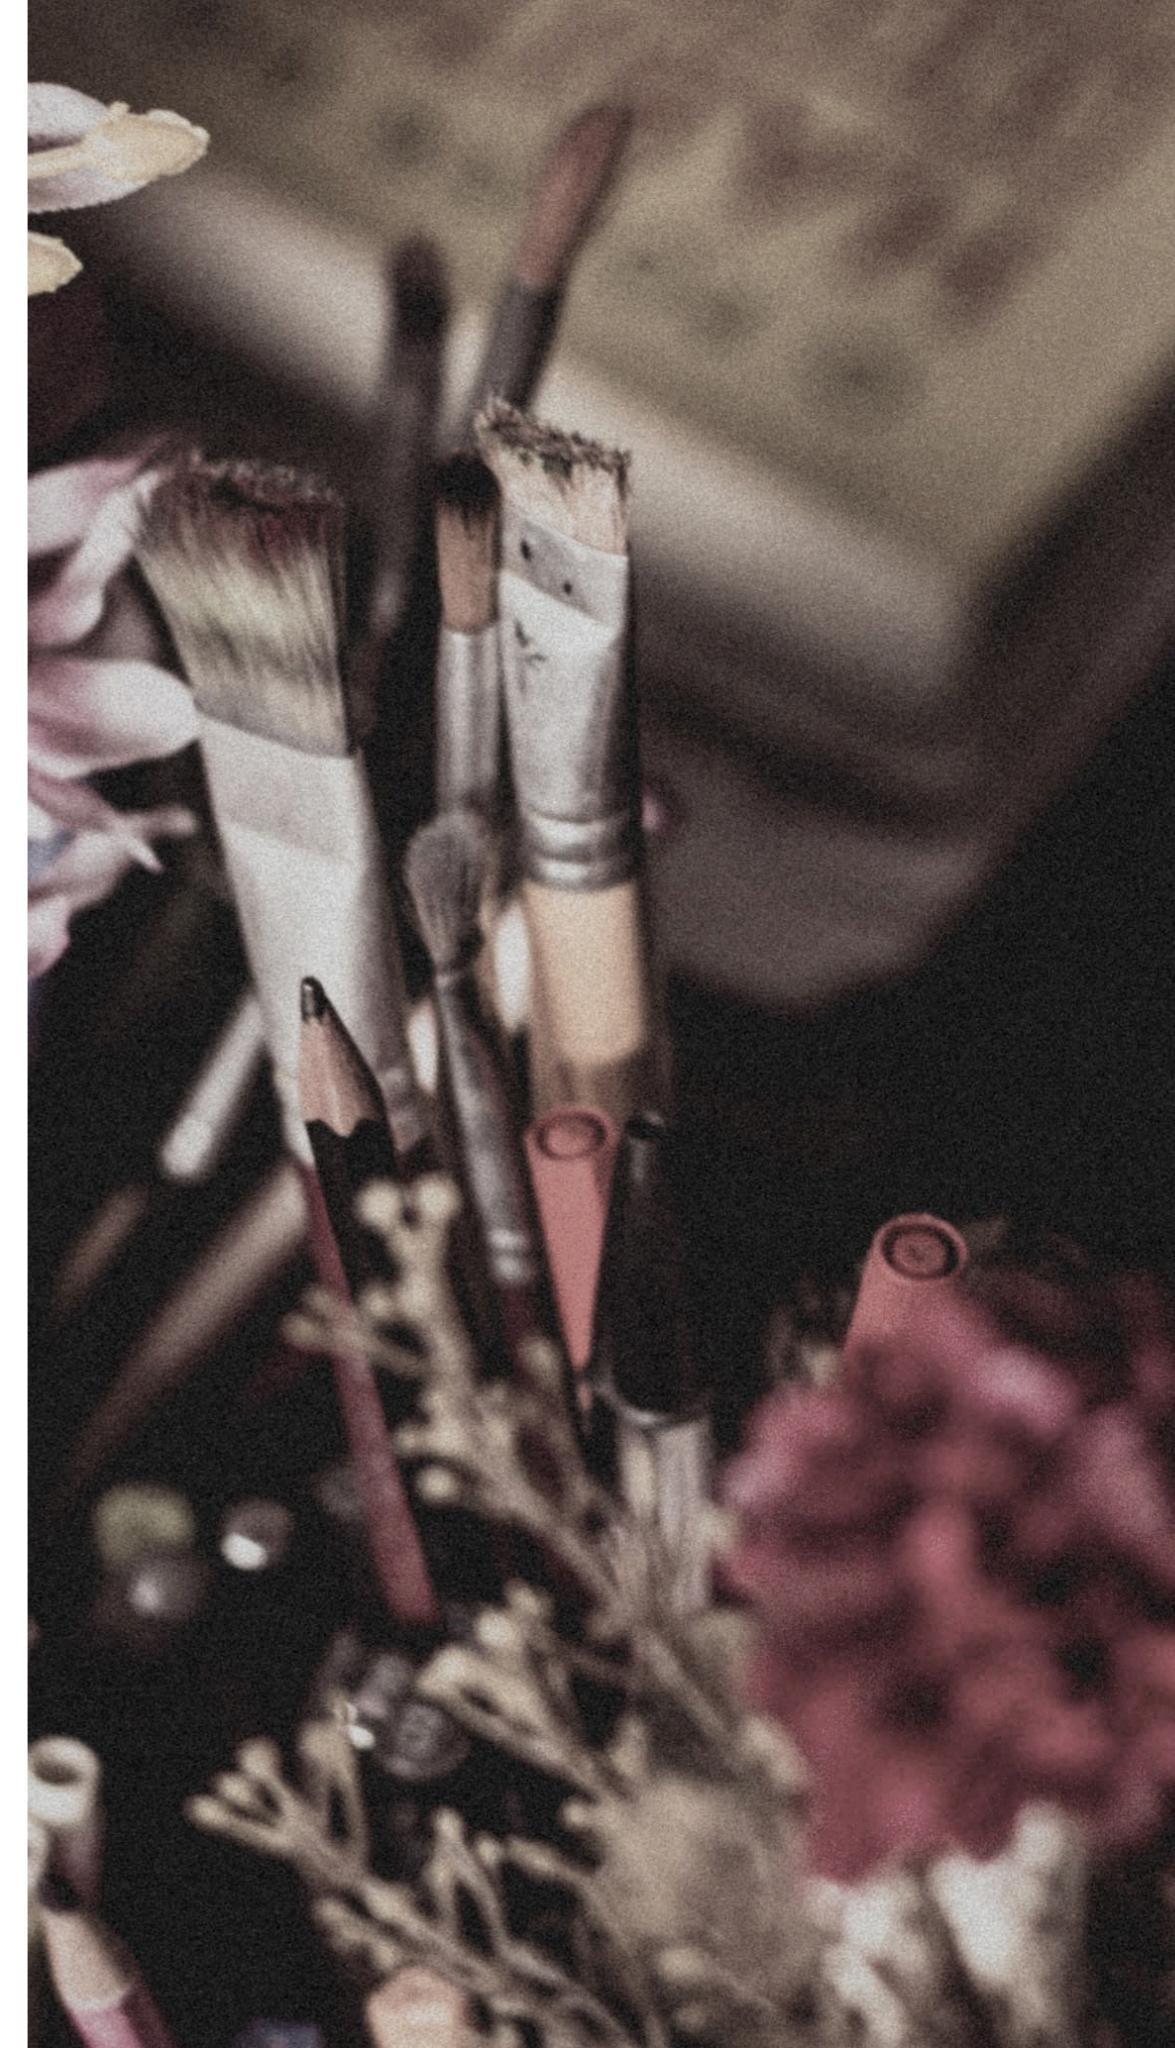

In order to receive help they must first *help* others
that are working on their DREAMS

IDEA

If they are not willing to give *first*

in order to *receive*

then they must pay

IN PLATFORM CURRENCY

▶ Code Hour

When delegating a task, one can select a maximum number of CH that they allocate

THEN

A bidding process starts between people who implement that task

The best implementation wins

(also taken into consideration the number of CH requested)

OTHER USE CASES

You can make money by working on other peoples projects

OR

You can invest money for developing parts of your project

HOW IS ONEFORCODE MAKING MONEY?

- ▶ Commission from every transaction
- ▶ In-App promoting packages for projects

WHY ONEFORCODE

- ▶ Gives people the opportunity to focus on what they really like
- ▶ Accelerates the development of a project
- ▶ Easy malleable for many use cases

THANK YOU
